INMED[®]
CORPORATION

We help you grow your business.

Who we are

Inmed Corporation is the country's leading and trusted master distributor of quality local and imported medical products and supplies. With the primary focus of providing solid marketing support, Inmed Corporation has established a dependable structure offering significant value to its resellers and dealers in the Philippines and neighboring Asia Pacific Countries.

Committed to help both local and multinational medical partner companies in the Philippines to achieve their target goals. Inmed Corporation continues to work hand-in-hand with them to extend and further expand market reach. The company utilizes its financial strength to purchase high volume supplies and offer its resellers savings at the best attainable cost.

Managed by a team of top professionals in the industry with combined experience of over 60 years in medical products, sales, marketing and distribution, Inmed Corporation boasts of seasoned round-table negotiations, financial packaging and the best business practices benchmarked on international standards providing economical and fundamentally sound solutions to your business needs.

Our Mission

Our mission is to provide quality local and imported medical products at competitive prices and offer professional customer-oriented service.

Our Vision

Our vision is to be the Philippines' leading master distributor of quality medical products – being the preferred supplier of all resellers in the industry and recognized as a strong partner in sustainable healthcare in the nation.

ISO Certified

INMED Corporation is ISO 9000:2015 certified by TUV, compliant with the International Organization for Standardization based in Geneva, Switzerland. It is our commitment to provide our customers with only high quality products, unparalleled service excellence, and reliable timely delivery of all customer orders. Customer satisfaction is our guarantee.

A young woman with curly brown hair, wearing blue medical scrubs, is smiling warmly at the camera. She is holding a silver tablet computer with both hands. The background is a blurred hospital or clinic setting. An orange semi-transparent banner is overlaid on the lower left side of the image.

General Nursing

Disposable Needles

Simplex Disposable Needles are precision grounded and beveled needles, designed to provide ease of penetration to reduce patient trauma.

Features and Benefits:

Individually packed in peel-pouch for safe storage and transport
With transparent luer-lock plastic hub made from polypropylene material
Ultra-sharp and ultra thin wall
Double bevel point

| DESCRIPTION / SIZE | QTY/BOX | QTY/CTN | MDR |
|------------------------------|---------|---------|-------|
| Disposable Needle, G18 - G30 | 100 | 50 | 05384 |

Disposable Syringes

Simplex Disposable Syringes are made from non-toxic, latex-free, non-pyrogenic material which offers a smooth, accurate motion along the entire length of the barrel for effective and atraumatic medication delivery.

Features and Benefits:

With bold scale markings which assures dosage control and accuracy
Luer-lock syringe tip on combination units
Ultra clear polypropylene barrel
Syringe with needle has ultra sharp needle, precisely honed and beveled for ease of penetration
Extremely smooth plunger to maximize control

Spitgard®

Higene Spitgard is a mouth shield, designed for protection from the spread of harmful bacteria that often occurs via subtle splashes of saliva from the mouth.

FEATURES AND BENEFITS:

- ▶ Transparent with anti-fog coating
- ▶ Lightweight, easy to wear and comfortable to use
- ▶ Designed to fit the chin without obstruction to the nose & mouth
- ▶ Effectively blocks saliva spurts and harmful bacteria
- ▶ Transparent frame presents a more natural look for the user
- ▶ Hygienic and cost-economical

Adult Diaper

FEATURES AND BENEFITS:

- ▶ Refastenable frontal tapes, good for multiple times of tape applications
- ▶ Soft and fitted leakage guard helps stop leakage for safe use
- ▶ Non-woven with soft and fine ventilative properties, enables fluid to pass flow back to keep skin dry and comfortable
- ▶ Made from absorbent layers of tissue, pulp and polymer

| DESCRIPTION / SIZE | UOM | QTY/BOX | QTY/CTN | MDR |

Adult Pull-Up Diaper

FEATURES AND BENEFITS:

- ▶ Durable diaper material yet soft and flexible
- ▶ Pull-up, easy to wear, feels just like a regular underwear
- ▶ 360° elastic waistband
- ▶ Super absorbent layer, absorbs up to 500cc/ml
- ▶ Soft and dry surface for a fresher feeling
- ▶ Leak guard protection
- ▶ Breathable, waterproof back film
- ▶ Available in different sizes for proper fitting

| DESCRIPTION / SIZE | UOM | QTY/BOX | QTY/CTN | MDR |
|--------------------|------|---------|---------|--------|
| Medium, Large & XL | Pack | 10 | 10 | 839583 |

Disposable Underpads

FEATURES AND BENEFITS:

- ▶ The core is filled with Super Absorbent Polymer (SAP) which absorbs fluid faster to keep the patient's skin dry
- ▶ The liquid is spread evenly and quickly as a result of the 3D absorption network, preventing build-up and providing user comfort
- ▶ The back sheet keeps the surface dry and eliminates moisture and leaks
- ▶ Constructed with breathable cotton, the material prevents dampness and is soft enough for baby's skin

| REF CODE | DESCRIPTION / SIZE | UOM | QTY/BOX | QTY/CTN | MDR |

Non-Contact Infrared Forehead Thermometer

TMS Non-Contact Infrared Forehead Thermometer is an infrared thermometer, specially designed to take the body temperature of a person regardless of the room temperature.

FEATURES AND BENEFITS:

- ▶ Memorization of the last 32 measurements
- ▶ Measuring distance: 5~15cm / Response Time: 0.5 seconds
- ▶ Over range indication: LCD will show "Hi" / "Lo"
- ▶ Automatic selection range and display resolution 0.1°C (0.1°F)
- ▶ Surface temperature range: 0 to 60°C (32°F to 140°F) basic accuracy

| REF CODE | DESCRIPTION / SIZE | UOM | QTY/BOX | QTY/CTN | MDR |

Non-Contact Infrared Forehead Thermometer

Lepu Non-Contact Infrared Forehead Thermometer with innovative infrared technology, designed with high sensitivity that can quickly measure body temperature: accurately, safely and conveniently.

FEATURES AND BENEFITS:

- ▶ Imported sensor (German Hyman), with higher accuracy and smaller deviation range
- ▶ The innovative infrared technology with high sensitivity can quickly measure the body temperature in a non-contact way
- ▶ Three color backlight that provides visual alert for quick assessment
- ▶ Novel design that enhances ease of use and ensures durability
- ▶ It provides accurate and reliable readings within a range of 5cm
- ▶ Response Time: 10s(+/- 1s)

| REF CODE | DESCRIPTION / SIZE | UOM | QTY/BOX | QTY/CTN | MDR |

Infrared Non-Contact Thermometer

BK Infrared Non-Contact Thermometer is engineered for faster and safer, non-contact body temperature identification. This device does not compromise precision and is ideal for wide range of industries.

FEATURES AND BENEFITS:

- ▶ Reliable and accurate, delivers temperature readings faster and with unfailing accuracy.
- ▶ High-sensitivity, easy-to-use and durable.
- ▶ Backlight LCD display with automatic selection range and display resolution.
- ▶ Faster measurement result, ideal for continuous monitoring with automatic trigger off.
- ▶ Weight: 85g, Size: 95mmX42mmX139mm
- ▶ Measuring Time: ≤1s

| REF CODE | DESCRIPTION / SIZE | UOM | QTY/BOX | QTY/CTN | MDR |

Ear & Forehead Thermometer

TMS Ear & Forehead Thermometer is a very convenient choice for quick temperature monitoring.

FEATURES AND BENEFITS:

- ▶ Body Temperature Range: 32.0~42.9°C (89.6~109.3°F)
- ▶ Accuracy: ±0.2°C
- ▶ Environment Temperature Range: 10.0~40.0°C
- ▶ Fever Alarm: 37.8°C
- ▶ Quick result within 1 second
- ▶ High-quality sensor guarantee high accuracy measurements
- ▶ Automatic measurement without pressing any button
- ▶ Green and Red backlight color indicates temperature level

Fingertip Pulse Oximeter (F-100)

Inmed Fingertip Pulse Oximeter F-100 is engineered to provide reliable results even with the presence of motion artifact, designed with user-friendly menu, clear display and innovative visual alarm system.

FEATURES AND BENEFITS:

- Color OLED display that ensures simultaneous display for testing value and plethysmogram.
- Advanced DSP algorithm inside minish the influence of motion artifact and improve accuracy value for low perfusion.
- Measures both heart rate and oxygen saturation levels.
- Lightweight, easy-to-use and ensures fast and reliable results.
- Allows manual adjustment of the direction of interface.
- Visual alarm function and low battery voltage indicator.
- Comes with avant garde carrying case.

| REF CODE | DESCRIPTION / SIZE | UOM | QTY/BOX | QTY/CTN | MDR |

Fingertip Pulse Oximeter (F-110)

Inmed Fingertip Pulse Oximeter F-110 is engineered for easy, fast and reliable measurement of Oxygen Saturation (SpO2), Pulse Rate(PR) and Perfusion Index(PI).

FEATURES AND BENEFITS:

- OLED display of SpO2, PR, PI, Pulse Bar and Waveform
- Dual-wavelength LED sensor with four direction display
- Compact design, lightweight and splash-resistant
- Accurate and sensitive
- Spot check and continuous measuring mode
- Pulse rate analysis for spot check measurement
- Audible and visual alarm with low battery indication
- Automatic power on/off
- Dimension: 56 mm (L) \times 34 mm (W) \times 30 mm (H) Net Weight: 52g

Handheld Pulse Oximeter (A-360)

TMS Handheld Pulse Oximeter A-360 provides an easy and accurate assessment of blood oxygen saturation (SpO2) and pulse rate.

FEATURES AND BENEFITS:

- Lightweight and easy-to-use
- Using DB9 type connector, compatible with Nellcor SpO2 sensors
- Support the oximeter probe for adult, neonate and infant
- Big size 2.8 inch color TFT LCD display for SpO2 and PR
- Visual and sound alarm functions
- Silicone rubber shell protection with stand

SP20 Handheld Pulse Oximeter

Creative SP20 Handheld Pulse Oximeter is a handheld pulse oximeter, designed to provide accurate measurement against low perfusion, provides reliable monitoring even for motional situation and higher sensitivity for monitoring weak pulse signal.

FEATURES AND BENEFITS:

- 3.5" TFT display with rotation viewing
- SpO2, temperature and pulse rate monitoring all in one device
- Move Oxy SpO2 Technology ensures accurate monitoring even in motional situation
- With built-in rechargeable Lithium battery that can last up to 18 hours of continuous monitoring
- With 500 hours of data storage
- With charging stand
- Suitable for adult, pediatric and neonate patients

A close-up photograph of a healthcare worker wearing a blue bouffant cap, clear safety goggles, a white N95-style respirator mask, and blue nitrile gloves. The worker is adjusting the strap of the goggles with their gloved hand. In the background, another person in similar PPE is blurred. A purple semi-transparent banner is at the bottom of the image.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Panamed®**KN95-W Particulate Respirator**

Panamed KN95-W Particulate Respirator provides four layer respiratory protection against airborne bacteria, viruses, dust, fumes and droplets. Wing design for convenient storage.

**FEATURES AND BENEFITS:**

- Provides particulate filtration efficiency of $\geq 95\%$, PM2.5
- With medical-grade filter protection against harmful particles
- Adjustable nose clip for perfect tight seal
- Durable, smooth and non-irritating to wear
- Breathable 3D flex design allows ease of breathing
- Strictly complies to GB2626-2019

Panamed®**KN95-H Particulate Respirator**

Panamed KN95-H Particulate Respirator provides five layer respiratory protection against airborne bacteria, viruses, dust, fumes and droplets. Designed with adjustable over the head strap for adjustable fitting.

**FEATURES AND BENEFITS:**

- Provides low breathing resistance with high filtration efficiency
- With ultrasonically welded, adjustable head strap that allows better fit
- Adjustable nosepiece for custom seal
- Particle Filtration Efficiency (PFE) against non-oily particles $\geq 95\%$
- Bacterial Filtration Efficiency (BFE) $\geq 95\%$
- Comfortable 3D flex design allows ease of breathing
- Free of odor and stimulation
- Strictly complies to GB2626-2019

Panamed®

Coverall

Panamed Disposable Protective Coveralls are designed to provide safety and excellent barrier protection against dust, airborne contaminants, body fluid, blood, bloodborne pathogens, chemicals and biohazards.

FEATURES AND BENEFITS:

- Provides 99.99% resistance against dust, biologically contaminated liquid and other airborne particles.
- Lightweight for better comfort on hot and humid weather
- Anti-static, impermeable, chemical and fluid resistant
- Provides excellent barrier protection but does not compromise comfort.
- Front zipper with storm flap that provides double seal protection
- Durability that provides high-resistance against abrasion and tearing
- Available in Standard and Blue Seam Tape (BST)
- Meets CDC and WHO recommended standards

Heparin Lock

Unimex Heparin Lock is an auxiliary medical instrument inserted into an I.V. catheter, mainly used as an injection port or site to safely administer fluid medication or draw blood samples, preventing reflux of blood.

FEATURES AND BENEFITS:

- ▶ Leakage-free, tight fitting adapter
- ▶ Closed injection site for durable puncture (transparent type)
- ▶ Transparent material allows observation of flow (transparent type)
- ▶ Effectively provides vein accessibility that promotes patient comfort and saves time during IV administration
- ▶ Also available in Needle-Free safety type for prevention of needlestick injury

Panacan®

Safety I.V. Cannula

Panacan Safety IV Cannula is used to provide access to the peripheral system for the delivery of IV fluid and medication. It has integrated safety feature, covering the needle after use to prevent accidental needlestick injury.

FEATURES AND BENEFITS:

- ▶ Tapered and siliconized which offers high resistance to kinking
- ▶ Minimum resistance during insertion, therefore less traumatic to the patient
- ▶ With radiopaque line for placement confirmation during X-ray
- ▶ Color-coded as per international standards
- ▶ Latex-free, DEHP-free and PVC-free

Unimex® 3-Way Stopcock

Unimex 3-Way Stopcock is a valve turning plug that controls/regulates the flow of fluid. Used with IV tubing to turn off one solution and turn on another.

FEATURES AND BENEFITS:

- ▶ Fully transparent polycarbonate body for visualization of flow
- ▶ Uniform smooth bore that permits maximum infusion flow without any turbulence or air-bubble formation
- ▶ Arrow indication marks indicating direction of flow, rotating dead space for accurate drug administration
- ▶ Tight covers for all channels, minimizing contamination
- ▶ 360° rotation

**Unimex®**

Extension Tubing (Luer lock)

Unimex Extension Tubing is a transparent tubing used to attach to an infusion line, incorporated with male and female luer lock connectors for intravenous solution administration.

FEATURES AND BENEFITS:

- ▶ Made of clear and non-toxic medical grade PVC
- ▶ With male and female connector
- ▶ Luer lock with cap
- ▶ Universal connector
- ▶ Non-pyrogenic
- ▶ Tube length is 50cm and 100cm

Unimex®

Multi-Lumen NF Extension Tube

FEATURES AND BENEFITS:

- ▶ Needle-free luer access valve for prevention of needlestick injury among healthcare workers
- ▶ Closed system to prevent bloodstream infection
- ▶ Color-coded slide clamp for easy identification
- ▶ Kink-resistant tubing which is made from medical grade Polyurethane, providing resilience and durability

Unimex®

Pre-Filled Saline Flush

FEATURES AND BENEFITS:

- ▶ Contains 0.9% Sodium Chloride (NaCl)
- ▶ Syringe plunger seal allows smooth glide and provides leak-proof seal between the plunger and the barrel.
- ▶ Transparent barrel with clear printed graduation markings.
- ▶ Luer lock for secure connection, preventing leakage
- ▶ Ready-to-use, no preparation needed
- ▶ Available in 3, 5 and 10cc
- ▶ PVC free, DEHP-free and latex-free
- ▶ Gamma sterilized

Unimex®

NF Infusion Set (Micro & Macro Drip)

FEATURES AND BENEFITS:

- ▶ Needleless Y-injection port for maximum safety against needlestick injury
- ▶ Luer lock fitting adaptor that allows easy and secure connection of IV cannula
- ▶ Sharp spike for better penetration of glass/plastic bottle
- ▶ Dripping port provides constant precision drip over long duration
- ▶ Especially designed roller clamp for better flow control
- ▶ 200cm kink-resistant tubing
- ▶ Easy to open single peel pack
- ▶ Micro drip: 60 drops/ml
- ▶ Macro drip: 20 drops/ml
- ▶ Pyrogen-free

Unimex®

NF Volumetric Infusion Set

Unimex Needle-Free (NF) Volumetric Infusion Set is used for administration of IV medications, designed to decrease risk of fluid overload. Enables mixing and incorporating of liquid medications.

FEATURES AND BENEFITS:

- ▶ 150cc calibrated burette chamber that allows control of fluid volume and avoids inadvertent overinfusion
- ▶ Float valve prevents entrance of air in the fluid line once the measured volume chamber is empty
- ▶ Micro drip: 60 drops/ml
- ▶ Needleless Y-injection port provides maximum safety against needlestick injury

Unimex®

Pressure Infusor

FEATURES AND BENEFITS:

- ▶ Clear and durable construction provides good visibility of the fluid bag and fluid level.
- ▶ Consistent fluid flow for effective fluid management.
- ▶ Large squeeze bulb provides fast inflation of the infusor.
- ▶ Highly-visible pressure gauge facilitates fast setup and easy maintenance.
- ▶ The hi-flow stopcock valve allows clear-cuff to be deflated almost instantly without squeezing the cuff bag.
- ▶ Loads quickly and easily
- ▶ Available in 500ml and 1000ml
- ▶ Single patient use to prevent cross-contamination

Injection Plaster

Panapore Injection Plaster is used as a normal spot dressing in intramuscular injection, especially designed to cover & protect the puncture site, absorbs blood cleanly, easy to apply and allows painless removal.

FEATURES AND BENEFITS:

- > Made from non-woven fabric
- > Pad protects the puncture site and absorbs blood cleanly.
- > Allows secure fastening with high adhesive performance and strength.
- > Adhesive tape is gentle on skin and allows painless removal.
- > **Dimension:** 30mm x 30mm, **pad:** 12mm x 12mm
- > Recommended needle gauge per puncture site: G18-32

Stanch Plaster

Panapore Stanch Plaster is an adhesive bandage with hemostatic pad that provides protection to the puncture site, designed to absorb blood cleanly, quickly and effectively.

FEATURES AND BENEFITS:

- > Stretchy base fabric gives right amount of pressure to stop bleeding fast.
- > Pad protects the puncture site and absorbs blood cleanly.
- > Easily and hygienically attached to the skin.
- > Adhesive tape is gentle on skin and allows painless removal.
- > Ideally used during blood drawing/collection or in dialysis.
- > **Dimension:** 30mm x 72mm, **pad:** 16mm
- > Recommended needle gauge per puncture site: G14-17

Surgical Plastic Tape

Unimex Surgical Plastic Tape is used to anchor any medical device, bandage or dressing. These tapes have hypoallergenic adhesion, designed to hold firmly onto the skin, dressing materials, and underlying layers of tape. Removes easily without damaging the skin.

FEATURES AND BENEFITS:

- > Non-occlusive and transparent
- > Hypoallergenic, does not cause skin irritation
- > Allows high skin tolerance, safe to use on fragile skin
- > Good adhesion, removes cleanly and painlessly
- > Tears easily, no need to use scissors

Professional Patient ID Band

Panamed Professional Patient ID Band enables quick and easy printing of patient information, barcodes and images directly into the wristband surface, on-demand and in full color.

FEATURES AND BENEFITS:

- > On-demand color wristband capability
- > Color coding for special designations or alerts
- > Durable, wear-resistant and hypoallergenic
- > Unique "bracelet" design provides ultimate patient comfort
- > Print full color text, logos, graphics, barcodes, photos and other identifiers on-demand

Thermal Patient ID Wristband

PDC Thermal Patient ID Wristband provides positive patient identification to prevent human errors for improve patient safety and enhance workflow.

FEATURES AND BENEFITS:

- > Versatile and easy to use, allows easy loading and replacement of rolls
- > Provides crisp, fast and durable imprints that maintain effectiveness throughout the patient's hospital stay
- > Produces on demand barcoded patient ID
- > Consistently accurate scan reliability, improves workflow efficiency
- > Lightweight, smooth, convenient and comfortable to wear

Direct Thermal Printer

PDC has designed a best in class printer. This unique printer has been developed specifically to meet the needs of printing wristbands for reliable patient identification.

Tendercare® Thermal Wristband

PDC TenderCare Thermal Wristband is a special set of wristband, designed to ensure that every newborn baby is positively identified and match with their mother.

FEATURES AND BENEFITS:

- > Exclusive patent-pending 2-part wristband system that positively identifies mother and baby
- > Patented PermaPrint surface provides best imprint quality and maximum resistance to solvents
- > Ultrasoft material for delicate newborn skin
- > Supports text linear 2D barcodes, photo ID and graphics
- > Ensures crisp, clear barcodes for easy scannability

Tubular Net Bandage

Unimex Tubular Net Bandage allows retention of primary wound dressings, providing post surgical support without compression. Offers a good alternative to adhesive surgical tape; holds gauze, hot and cold packs, IV tubes and other medical devices.

FEATURES AND BENEFITS:

- > Open weave design allows air flow and permits freedom of movement.
- > 100% latex free elastic and polyester.
- > Whiter and softer than competitive products.
- > Conforms to all body contours, allowing unrestricted movement.
- > Skin-friendly alternative to tapes and adhesives.
- > With total of 9 sizes of choice for different types of application.
